**LSchultz@MeridianWaste.com**

no legwork - no hassle - call us for anything - waste evaluations - container recommendations

What makes Special Waste "special" is the handling and documentation associated with collecting, transporting, and disposing of the waste. These wastes also may be characteristically dusty, odiferous, voluminous, potentially regulated, and caustic.

# TURNKEY AND CUSTOM SERVICES

## Free In-Depth Evaluations

**Free deep-dive consultations** discussing your waste streams, disposal logistics, compliance and regulatory concerns, and analysis, documentation, and auditing needs.

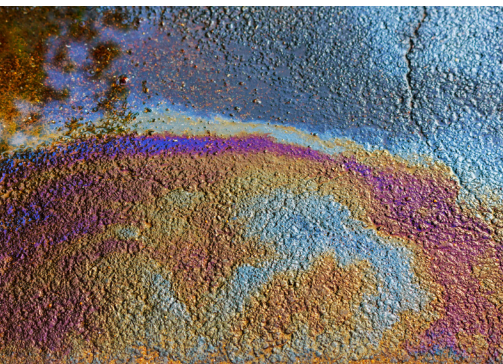

Our consultations include directing you on next steps, even if waste testing results keep us from accepting some of your materials for disposal.

## Full Range of Services

From the very first call, we *partner* with you. To us, that means comprehensive, expert services that save you time, money, and help you better navigate the nuances unique to special wastes management.

Getting to know you and your business, we will:

- **Discuss your specific needs** and create an **outline of next steps**, mapping the big picture so you can make **data-informed decisions** with the assurance we have **your best interests in mind from day one**.
- Work via efficient processes to **eliminate unnecessary time delays and costs**.
- Conduct waste stream identification and **determine specific testing requirements**, saving you hassle and weeks of lost time.
- Deliver quick and accurate waste analysis and profiling for **fast approval**.
- **Contact and collaborate on your behalf** with haulers, the Department of Natural Resources (DNR), engineering, and tech labs, serving as your **single point of contact**.
- Be available for **emergency response**. We can provide same-day service or next-day turnaround.

## Fast Turnaround

Time is money, and moving trucks in and out of our landfill quickly means less time wasted, thus **increasing productivity** for your business.

## Single-Source Solutions and Single Point of Contact

Eagle Ridge Landfill keeps special waste simple by pairing you with a dedicated, specialized consultant to **handle the nitty-gritty details for you**—from arranging testing with tech labs, working with the DNR and private engineering firms, booking hauling companies for waste transit, and creating whatever types of paperwork you need to track your special waste streams **from initial analysis to verified disposal**.

## Management of Compliance and Regulatory Issues

We've got you covered on the front lines, **helping you stay in compliance with complex, changing regulations** and analyzing and tracking your waste streams to ensure they are properly handled and disposed of, from end to end.

## Site Waste Audits and Verification

Bids or contracts may require a Certificate of Destruction and other specific forms of documentation, even photographs. We'll work with you to identify and create whatever formats of paperwork you might need, and ensure you receive them promptly.

## Emergency Response

Should things take an unexpected turn, we've got your back. Eagle Ridge Landfill helps you **get on top of the situation with rapid, same-day response** whether you need **roll-off containers**, hauling complete with **live loads** and **dedicated drivers**, or other forms of support in addition to disposal.

## Documentation Tailored to You

Eagle Ridge Landfill is committed to providing service that truly fits your needs, right down to the paperwork. We are happy to arrange and even create **documentation solutions to support your specific business and compliance requirements**, including standard materials such as:

- Detailed Waste Profiles
- Ticketed Disposal Waste Tracking
- Verification Photographs
- Certificates of Destruction
- Pre-printed Manifests complete with all the information about your waste streams, approval codes, and locations.

## Ahead of the Competition

Eagle Ridge Landfill works with you one-on-one because **we're a true Missouri team, not a mega-corporation**.

To us, you're a partner in taking care of the environment—not a faceless account. That means we can deliver **a more focused approach to support the challenges your company faces** and provide strategic solutions designed with your specific business in mind.

## Disposing of Special Waste in Sanitary Landfills

Eagle Ridge Landfill is a carefully engineered structure built into the land, in which waste is insulated from the area around it. Landfills are an essential asset to almost every community. They provide a vital service—accepting and storing solid waste to prevent contamination between the waste and the surrounding environment, especially groundwater. Landfills are segmented internally into "cells" that are carefully filled, monitored, and maintained while they are active and for many years after they are closed. While all landfills follow the same federal regulations when being built, it is the operation and maintenance of so-called "sanitary" landfills like Eagle Ridge Landfill that set them apart from other companies and environmentally-minded waste management approaches.

## From the Initial Call to the Long Haul

Your dedicated consultant **helps you navigate the ever-changing landscape of special wastes management** and disposal from the very first phone call. We know the ins and outs of specific wastes including the regulations, agencies, testing bodies, and everything in between. We're eager to step in with assistance, advice, and direction to save you time and money, and avoid jumping through hoops. We want to get our hands dirty so you don't have to.

## YOUR NEEDS

## OUR SOLUTIONS

### ENVIRONMENTAL AND ECONOMIC SUSTAINABILITY

### ENVIRONMENTAL PROTECTION

Eagle Ridge Landfill meets or exceeds state and federal regulations for environmental compliance. Helping you save money and the environment, we provide numerous, flexible solutions that balance your needs for environmental responsibility and a strong bottom line.

### A PARTNER THAT UNDERSTANDS YOUR UNIQUE NEEDS

### SERVICE CUSTOMIZED TO YOUR NEEDS

Eagle Ridge Landfill provides turnkey and bespoke collection, transportation, and disposal of special wastes.

### COMPLIANCE

Staying in line with complex, changing regulations

### MANAGEMENT OF COMPLIANCE AND REGULATORY ISSUES

Eagle Ridge Landfill analyzes and tracks your waste streams to ensure they are handled and disposed of properly—from start to finish.

### TURNKEY MANAGEMENT

Keeping track of a wide variety of waste streams

### SINGLE-SOURCE SOLUTIONS

Eagle Ridge Landfill believes in dedicated, hands-on partnership and a forward-thinking approach to special wastes management.

### DISPOSAL OF MULTIPLE TYPES OF SPECIAL WASTE

### AN EXTENSIVE LIST OF ACCEPTED WASTES

Eagle Ridge Landfill accepts an extremely broad range of special wastes. Your consultant will discuss your waste streams and disposal needs, determine waste audit and profile testing to perform, collaborate with the DNR, testing labs, and transit companies on your behalf, and keep an eye on compliance and regulatory issues and changes.

### MAXIMIZE TRANSPORTATION PRODUCTIVITY

### FAST TURNAROUND

Eagle Ridge Landfill has efficient truck scaling and manifest systems to eliminate long wait times.

### COST REDUCTION

Controlling your bottom line

### IMPROVED WASTE FLOW EFFICIENCIES

Continual site and waste stream analysis and continuous improvement metrics help keep costs in line.

### PROMPT SERVICE

### FAST TURNAROUND

Eagle Ridge Landfill follows strict service standards to satisfy your timeline in an environmentally sound manner.

### WASTE REDUCTION

Minimizing waste streams

### MEETING AND EXCEEDING EXPECTATIONS

Our trained experts accurately profile the material and expedite the approval process to save time and money.

### IMPROVE EFFICIENCIES

### QUICK PROFILING AND APPROVAL

Eagle Ridge Landfill will accurately profile your special waste streams. Our efficient process for profiling will eliminate unnecessary time delays and costs associated with disposing of special wastes.

# DISPOSAL AND HAULING

Convenient, flexible service  
options for special waste  
handling, transit, and intake.

## Extra Services:

Live loads, dedicated drivers

## Disposal Only

Waste is delivered via your chosen hauler to Eagle Ridge Landfill for handling.

## Hauling via Meridian Waste

Meridian Waste roll-off containers are collected and delivered to Eagle Ridge Landfill via Meridian Waste vehicles.

## Hauling via Third-Party

Eagle Ridge Landfill consultant arranges a third-party hauler on your behalf to collect and deliver waste to Eagle Ridge Landfill.

## Emergency Response and Special Circumstances

Meridian Waste provides efficient, rapid response to emergencies in accordance with situation requirements.

# ROLL-OFF CONTAINERS

Roll-off containers are available  
in four sizes to suit your specific  
special wastes collection needs.

## Delivery of Containers

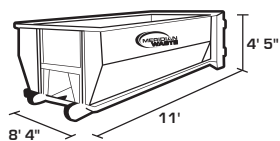

Delivery will be made on the due date. Delivery paperwork turned in by 5pm will be scheduled for the next day delivery.

## Roll-Off Haul Requests

Our goal is to meet extra haul requests for the same day, if possible. If not possible, next-day service will be our priority.

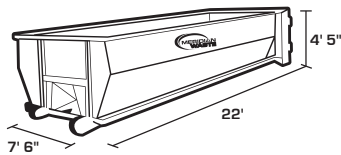

## Special Circumstances and Emergency Response

Same-day service will be provided for special circumstances and emergency situations.

# ACCEPTABLE SPECIAL WASTES

Partial list of accepted wastes. Please contact the Eagle Ridge Landfill Special Waste Consultant to discuss composition analysis of your waste streams.

Contaminated Soils  
Industrial Wastes  
Sandblast Waste  
Wastewater Screenings  
Spill Cleanups  
Construction and Demolition Debris  
Asbestos  
Ash  
Abrasive Blast Material  
Absorbent Material Used in Spill Cleanup  
Foundry Sands  
Grinding Residue and Grit Screenings  
Petroleum-Contaminated Soil  
Industrial and Manufactured Process Waste  
Municipal and Domestic Water and Wastewater Treatment Plant Sludges  
Class 1 Nonhazardous Industrial Waste  
Untreated Non-infectious Medical Waste (Autoclave Process Non-Infectious Medical Waste)  
Expired Medical Products  
Septic Tank Pumpings  
Grease and Grit Trap Wastes  
Slaughterhouse Wastes  
Dead Animals  
Industrial Sludge  
Stabilized Grit & Bar Screenings  
Absorbent Booms and Pads  
Pit Sludge  
Baghouse Dusts

# ACCEPTABLE SPECIAL WASTES

Partial list of accepted wastes. Please contact the Eagle Ridge Landfill Special Waste Consultant to discuss composition analysis of your waste streams.

Dried Paint Filters

Biosolids

Grease/Scum Waste

Auto Fluff

Wastewater Bio-Solids

Hydrofracking Waste

Hazardous Waste from Conditionally Exempt Small-Quantity Generators

Any Other Hard-to-Handle Material that is not Considered Hazardous Under RCRA

Cement Kiln Dust (CKD) Waste

The **fine-grained solid by-product** generated during the cement manufacturing process and captured by the facility's air pollution control system.

Crude Oil and Natural Gas Waste

**Certain wastes from the exploration and production of oil, natural gas, and geothermal energy:**

- **Wastes brought to the surface during oil and gas exploration and production operations**
- **Wastes that have come into contact with the oil and gas production stream** (e.g., materials used to process natural gas)

Fossil Fuel Combustion (FFC) Waste

FFC wastes produced from the burning of fossil fuels (i.e., coal, oil, natural gas), including **fly ash, bottom ash, boiler slag, and particulates removed from flue gas**

**Separately Managed Coal Combustion Wastes**

Large-volume coal combustion wastes generated at electric utility and independent power producing facilities that are managed separately

**Co-Managed Coal Combustion Wastes**

Large-volume coal combustion waste generated at electric utility and independent power producing facilities that are co-managed with certain other coal combustion wastes

**All remaining FFC wastes, including:**

- **Coal combustion wastes generated at non-utilities**
- **Coal combustion wastes generated at facilities with fluidized bed combustion technology**
- **Petroleum coke combustion wastes**
- **Waste from the combustion of mixtures of coal and other fuels**
- **Waste from the combustion of oil**
- **Waste from the combustion of natural gas**

# ACCEPTABLE SPECIAL WASTES

Partial list of accepted wastes. Please contact the Eagle Ridge Landfill Special Waste Consultant to discuss composition analysis of your waste streams.

## Mining Waste

**Most extraction and beneficiation wastes from hardrock mining** (the mining of metallic ores and phosphate rock)

## Mineral Processing Wastes

- **Most mining wastes generated during the extraction, beneficiation, and processing of minerals**
- **Iron blast furnace slag**
- **Slag from primary copper processing**
- **Slag from elemental phosphorous production**
- **Slag from primary lead processing**
- **Slag from primary zinc processing**
- **Red and brown muds from bauxite refining**
- **Phosphogypsum from phosphoric acid production**
- **Fluorogypsum from hydrofluoric acid production**
- **Gasifier ash from coal gasification**
- **Slag tailings from primary copper processing**
- **Calcium sulfate wastewater treatment plant sludge from primary copper processing**
- **Process wastewater from primary magnesium processing by the anhydrous process**
- **Process wastewater from phosphoric acid production**
- **Process wastewater from coal gasification**
- **Process wastewater from hydrofluoric acid production**
- **Air pollution control dust/sludge from iron blast furnaces**
- **Treated residue from roasting/leaching of chrome ore**
- **Basic oxygen furnace and open hearth furnace air pollution control dust/sludge from carbon steel production**
- **Basic oxygen furnace and open hearth furnace slag from carbon steel production**
- **Chloride process waste solids from titanium tetrachloride production**
